PROFESSIONAL SUMMARY

Hey there! I'm a fast-learning developer who loves turning ideas into polished, user-friendly web experiences. Adaptable, solution-oriented, and always ready to grow within dynamic, collaborative teams.

SKILLS

Front End: HTML5 | CSS3 | JavaScript | Typescript | React.js | Next.js | Framer | Jest | REST APIs | SEO | GraphQL

Tools: Git | Github | Figma | Notion | Trello | Jira

EDUCATION

Air Force Institute Of Technology

BSc Computer Science

Expected Graduation - [Aug 2025]

- Relevant modules: Software Engineering, Web and Internet Technology, Java, Algorithms and Data Structures, Systems Design and Security, Data Driven Computing, Human Computer Interactions

WORK EXPERIENCE

Mamaket

Frontend Developer

03/2024 - Current

Mamket is an e-commerce platform that enables foreigners residing in the United States to purchase items that are local to their home countries, bridging the gap between cultures and convenience through seamless online shopping.

Technologies: Next.js, GraphQL, Apollo Client, Ant Design, JavaScript &, Jest

- Rebuilding the existing website using Next.js, GraphQL, Apollo, and Ant Design to enhance performance, scalability, SEO, and user experience, which improves user retention by 20%
- Collaborating with backend engineers to integrate dynamic data via GraphQL APIs, ensuring smooth and efficient data fetching across the platform.
- Refactoring legacy frontend code to adopt modern component-based architecture, improving maintainability, developer productivity.

Hepzibah Clinic

Frontend Developer

10/2024 - 03/2025

Hepzibah Clinic is a healthcare center focused on delivering quality medical services and patient care through efficient health management systems.

Technologies: NextJS, TypeScript, TailwindCss, Antd, RESTful APIs & Javascript

- Developed an internal management system for Hepzibah Clinic using Next.js, Tailwind CSS, and Typescript, streamlining administrative operations and enhancing efficiency.
- Integrated patient management features to enable secure storage and retrieval of medical records, improving efficiency by 70%
- Implemented role-based authorization (RBAC) to ensure data security and proper access control, reducing unauthorized data access incidents by 40%.

HNG | telex.im

Frontend Developer (Intern)

06/2023 - 09/2023

A leading systems integrator in Sub-Saharan Africa, serving the continent's most prominent enterprises. Contributed to three significant projects during a 12-week internship, enriching technical, problem-solving, and collaborative skills.

- Collaborated with team members to develop a real-time threat monitoring software product, delivering notifications on errors, performance, and user activity in a chat-like format.
- Built using Next.js, NextAuth, Tailwind CSS, Shadcn, and TypeScript, enhancing responsiveness and user experience.

Nexus Solutions: A software development company focused on building modern, high-performance web applications for various clients across industries.

- Developed multiple web applications using React, Redux, and TailwindCSS, delivering responsive and performant user interfaces.
- Collaborated closely with designers to build accessible and visually engaging UI components, resulting in a 30% improvement in usability.

PROJECTS

DealSnap

Full-Stack Web Engineer

Developed Deal Snap, a web application designed to help users find the best shopping deals by comparing prices across multiple offers, ultimately empowering smarter and more cost-effective purchasing decisions.

- Built a responsive, user-friendly interface with Next.js, enabling both guest access for quick comparisons and authenticated user accounts with personalized features (Deal-saving).
- Engineered a robust backend using Express.js and MongoDB, supporting deal saving, price tracking, and secure user data handling.
- Deployed the frontend on Vercel and the backend on AWS, ensuring fast, scalable, and reliable access for users
