4%.

- Built and optimized the internal website using (Nextjs), centralizing important documents for easy staff access.

EDUCATION

Air Force Institute Of Technology, Kaduna — BSc Computer science

April 2022 - Present

PROJECTS

WorkerHub — *Personal project*

A web app designed for efficient worker management, similar to DevLinks but tailored for professionals. WorkerHub allows users to manage profiles, tasks, schedules, and documents in one customizable platform. Built with Next.js for a dynamic frontend, the app integrates seamlessly with a BAAS for robust data management. [Here](#)
